

Installation Instructions: Aquacisor/Spa Swimmer/ Spa Trainer Cover Lifter Brackets

Part Numbers

SAC0036 COVER LIFTER BRACKET SWIM SPA
HDW0020 #10 X 3/4 IN PHIL PH SELF-DRL Z-PL SCR

Installation Instructions

1. Locate one of the four (4) brackets in the upper corner of the frame (reference Picture 1). Ensure the front surface aligns with the front frame surfaces (top and side support beam).

2. Use the self-drilling screws to fix the bracket to the frame. It may help to pre-drill the holes but it is not necessary as the self-drilling screws will cut into the metal frame.
3. Complete all four brackets, then refer to the Cover Lifter 200 installation instructions (note that the Aquacisor, Spa Swimmer, & Spa Trainer are considered Round-Corner Spas).
