

# Electrical Guide – *Sparta Series*

This guide is designed to help you best prepare for the Sparta Series hot tub you have ordered or are planning to order.

## ***Calypso, Sirrus, Triton, & Xanadu Models***

240V, 60 Amp, 4-wires  
(Wire Gauge: 6 AWG)

Recommended Service: Heater is able to heat water at a rate of 5-8°/hr with all pumps operating simultaneously. This service allows a potential upgrade in the future.

240V, 40 Amp, 4-wires  
(Wire Gauge: 6 AWG)

Minimum Service: Heater is able to heat water at a rate of 5-8°/hr with one pump operating. If both pumps are activated, the heater will automatically disengage.

A 240V service requires an electrician to run a dedicated GFCI protected circuit from your main panel, to an approved disconnect, to the spa.
